THE "OVERHEAD DOOR" TRADE MARK

gives

RAISED & ROUTED DOORS

These 15 carved and raised panels offer you multiple combinations of color and design to dramatize the garage door . . . and the face of any home.

Far home garage doors five sections high.

Door panels are 3/4" thick and raised on one side. The designs are routed out of the solid wood and may be any of the 15 designs shown here. Routed panels may be combined with plain, raised panels to form a combination.

Width of router bit is 5/8" and greatest depth is 3/8".

FLUSH & SPECIAL DOORS

For sheer simplicity of beauty, the flush door is often preferred. Many options of glass arrangements, molding and add-on decorations are available.

STANDARD & SPECIAL DOORS

Standard doors in 5 sections may be modified into multi-panel colonial designs and decorated with ornamental add-ons. Decorated Crusader door shown last offers a special economy.
